Bravo AI Engine v2.4

Executive Summary

Chain-wide performance overview · May 2026

The Bravo AI engine analysed 2,400+ daily operational data points across spoilage events, inventory rotations, FIFO scans, and task completion logs. Chain productivity improved 4.3 pts quarter-on-quarter. Waste reduction initiatives delivered a net saving of ₺38,400 this quarter, with ₺153,600 projected annualised savings at current trajectory. FIFO non-compliance remains the lead risk in Fish and Dairy.

Chain Productivity 74.2 /100 +4.3 pts QoQ	Waste Reduction 18.4 % +6.1% vs Q1	FIFO Compliance 87.2 % ! from 81.4%	Spoilage Rate 6.1 % !" from 8.7% Q1

'& AI ENGINE KEY FINDINGS

- Branch 04 Meat dept is top performer (91/100) — recommend cross-branch knowledge transfer.
- Fish departments: 3 of 5 branches below 90% cold-chain compliance threshold.
- Bakery waste cut 23% after AI daily mission system deployment — strongest gain this quarter.
- Inventory FIFO improved from 74% !' 86% following targeted morning-rotation missions.

Branch Performance Overview

Branch	Location	Productivity	FIFO	Waste	Q2 Savings	Status
Branch 01	Baku Central	76.4	88%	5.8%	₺8,200	ON TRACK
Branch 04	Baku North	81.2	91%	4.2%	₺11,400	ON TRACK
Branch 09	Sumqayit Main	69.8	83%	7.9%	₺5,600	AT RISK
Branch 12	Ganja Central	72.1	86%	6.8%	₺7,100	AT RISK
Branch 15	Mingachevir Market	71.5	84%	7.1%	₺6,900	AT RISK

TOTAL Q2 WASTE COST	SAVINGS vs Q1	ANNUALISED PROJECTION
₺18,300	₺4,100 (" 18.3%)	₺153,600

Department KPI Analysis

AI-generated KPIs · Branch 01 deep-dive + chain achievement

KPI Status — Branch 01 (All Departments)

Dept	KPI Description	Current	Target	Status
Meat	Reduce expired quantity by 15%	82%	90%	AT RISK
Meat	Achieve 92% FIFO compliance	94%	92%	ON TRACK
Fish	Cold-chain compliance above 95%	86%	95%	AT RISK
Fish	Cut spoilage rate below 6%	71%	94%	OFF TRACK
Fish	Morning freshness check by 9 AM	92%	90%	ON TRACK
Bakery	Reduce end-of-day bread waste by 20%	90%	90%	ON TRACK
Bakery	Same-day sell-through above 88%	93%	92%	ON TRACK
Dairy	Cold storage temp compliance	84%	90%	AT RISK
Dairy	Near-expiry clearance rate	67%	90%	OFF TRACK
Vegetables	Daily freshness inspection 100%	95%	90%	ON TRACK
Shelf	Shelf availability above 96%	91%	96%	AT RISK
Inventory	Stock accuracy above 98%	96%	94%	ON TRACK

KPI Achievement Rate by Department (Chain-wide)

Meat		71% KPIs on track	79/100
Fish		48% KPIs on track	62/100
Bakery		87% KPIs on track	84/100
Dairy		52% KPIs on track	66/100
Vegetables		74% KPIs on track	76/100
Shelf		80% KPIs on track	81/100
Inventory		68% KPIs on track	74/100

Waste Intelligence Report

AI Daily Missions

Operational mission system · Week of 12–16 May 2026

Mission Completion Rate — All Departments

Mission	Departments	Freq	Completion	Status
Morning FIFO Rotation Check	Meat, Fish, Dairy	Daily	92%	ON TRACK
Cold-chain Temperature Audit	Fish, Dairy	Daily	78%	AT RISK
End-of-Day Waste Logging	All Departments	Daily	96%	ON TRACK
Near-Expiry Product Clearance	Fish, Dairy, Meat	Daily	71%	AT RISK
Shelf Gap Replenishment < 10 min	Shelf	Hourly	88%	ON TRACK
Freshness Visual Check	Vegetables, Bakery	2× Daily	94%	ON TRACK
Inventory Cycle Count	Inventory	Weekly	83%	ON TRACK
Planogram Compliance Audit	Shelf	Weekly	97%	ON TRACK
Cross-dept Rotation Log Submission	All Departments	Daily	68%	AT RISK

AI Strategic Recommendations

HIGH Cold-Chain Intervention — Fish Dept (BR-09, BR-01, BR-15)

Three branches are below the 90% cold-chain compliance threshold. Mandatory twice-daily temperature audit with manager sign-off required. Estimated waste reduction: ¼4,200/quarter.

HIGH Near-Expiry Clearance Protocol — Dairy Dept (Chain-wide)

Dairy near-expiry clearance at 67% vs 90% target. Implement AI-triggered markdown pricing at T-48h. Projected revenue recovery: ¼6,800/quarter.

MEDIUM Cross-Branch Knowledge Transfer — Meat Dept (BR-04 !' BR-09, BR-15)

Branch 04 Meat outperforms chain average by 12 pts. Schedule structured workflow knowledge-share. Target: lift BR-09 & BR-15 by 8+ pts in Q3.

MEDIUM FIFO Training Refresh — Dairy & Fish Depts

FIFO compliance in Dairy (75%) and Fish (78%) is lowest chain-wide. Recommend 2-hour in-store refresher with hands-on rotation exercise. Target: 85% within 30 days.

Appendix & Methodology

Data sources · Scoring formula · Glossary

Productivity Score Formula

Score = 0.30 × WasteReduction + 0.25 × FIFOCompliance + 0.20 × Turnover + 0.15 × TaskEfficiency + 0.10 × SalesGrowth

All components normalised 0–100. Weights calibrated against historical branch performance data.

Data Sources

Data Source	System	Refresh Cadence
Inventory Rotation Logs	POS + WMS integration	Real-time
Cold-chain Temperature	IoT sensor network	Every 15 min
FIFO Compliance Scans	Barcode scanner events	Per scan
Staff Task Completion	Mobile app check-ins	Per event
Spoilage Event Reports	Manager app entries	Per event
Sales Velocity	POS transaction stream	Hourly
Planogram Compliance	Image recognition (AI)	Daily audit

Glossary

FIFO	First-In, First-Out — stock rotation principle ensuring oldest inventory is sold first.
Waste Rate	Percentage of received stock discarded due to spoilage, damage, or expiry.
Productivity Score	Composite 0–100 score measuring department operational efficiency (see formula above).
Cold-chain	Temperature-controlled supply and storage system for perishable goods.
Mission	AI-generated daily operational task assigned to a department to address a detected risk.
Cross-Branch	Ranking of same-category departments across all branches to drive performance.

This report is generated automatically by the Bravo AI Workforce Intelligence engine. All data is based on operational inputs from branch management systems and is accurate as of the report date. For queries contact the Bravo AI platform team.
